Which mimic holds each target for the longest dosing interval

Structures are illustrations of the deposited coordinates; every value is read from the design space.

BACE1 · 4D8C

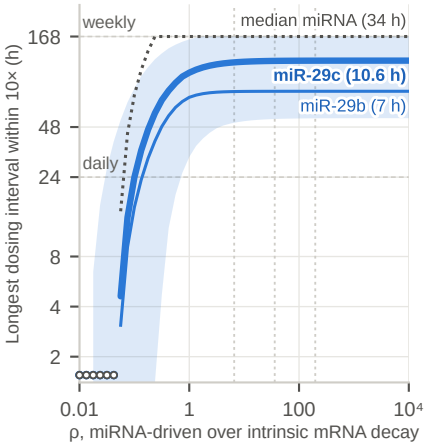

Aβ42 fibril · 5OQV

α-synuclein fibril · 6CU7

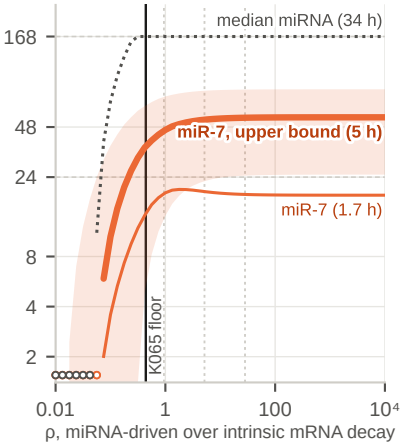

a

Alzheimer's disease · fall required 29.2%

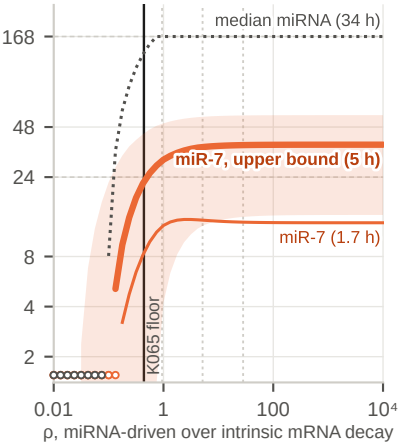

b

Parkinson's disease · fall 30% (K058)

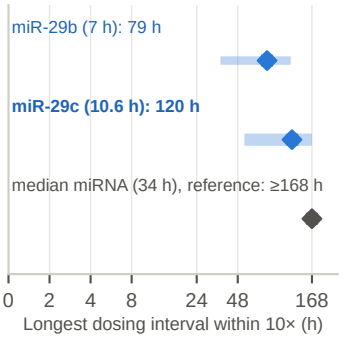

c

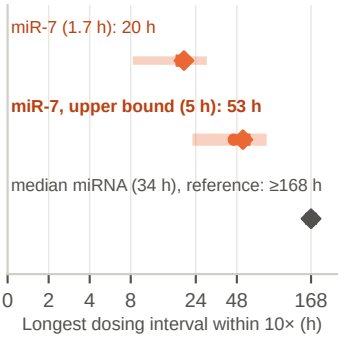

Parkinson's disease · fall 43% (K063)

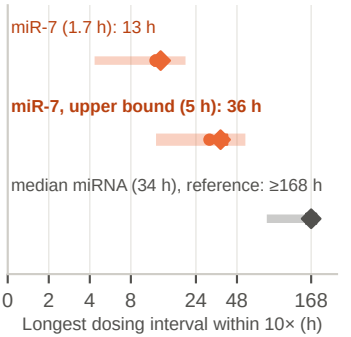

d

e

f

first place, primary reading; band: 3× to 30×

other series, same rule; dotted: reference of median stability (34 h)

Row 3 markers: ○ low, ◈ midpoint and □ high end of the scan of ρ; hollow at 0 h when no interval qualifies. Vertical dotted lines in a to c: the three anchors of ρ.
